NOTES:

1. The stability of units with internal reference is ±1 PPM over the temperature range.
2. The Frequency adjustment is located on the bottom of the unit and is only applicable on units with internal reference.
3. The 'REF IN' connector is not provided on units with internal reference.
4. Vcc is +5.2VDC **at the unit**. A power dropping resistor will be supplied as required for a specific Vcc, upon request .
